FEELING SICK?

please STAY HOME

WE HAVE THE POWER TO STOP THE SPREAD OF COVID-19.

If you feel sick and/or have been in close contact with a person who has COVID-19, please stay home. Let your family, friends, employer and colleagues know that you could potentially have the virus. It's important that you separate yourself from others. Please monitor your health for 14 days, and remain in your place of quarantine, unless you need urgent medical attention or need to take a free COVID-19 test, which is recommended.
